

# *4" Pump Spray Bar*

## Dimensions

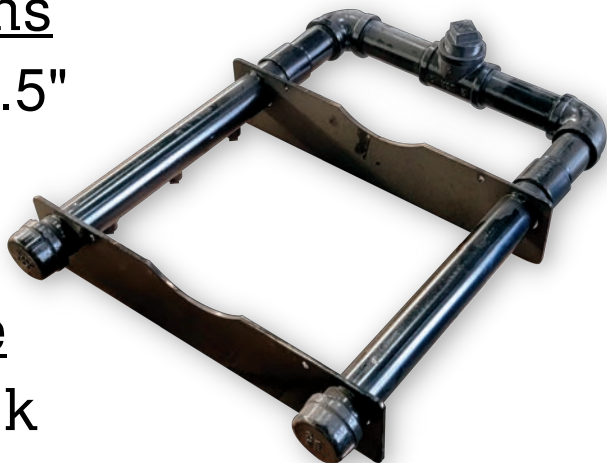

28"x23"x8.5"

## Weight

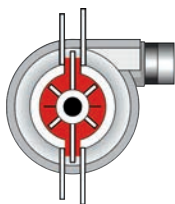

45lbs

## Discharge

2" Camlock

The Fast Flow spray bar attachment is designed to quickly create a fine slurry, which allows for easier removal of dirt, sediment, lime and other waste materials in your water treatment plants or industrial waste sediment ponds. The spray bar feature uses the power of water on its own to help break down the solids and put it into a pumpable suspension, all without impacting the performance of the Fast Flow Pump.
