

The only submersible pump with no mechanical seals, no wear plates and no internal friction.

Features

- Very High Flow Rates
- High Vertical Head Pressure
- Self Priming
- Run Dry Technology
- Variable Speed & Flow
- Small Portable Size
- Advanced Metallurgy
- NO Mechanical Seals
- NO Internal Friction
- Low Maintenance Design
- Twin Shaft Bearings for Long Life
- Designed for Solids & Slurry Jobs
- No shaft couplings, fewer parts
- Larger 1.5" Shaft with 17.4 material upgrade

Model FF-4D-SM

Fast Flow's patented double suction technology produces superior flow rates and high head pressures. It is the only line of submersible pumps with no mechanical seals and no internal friction allowing the pump to run dry or cavitate. The high efficiency hydraulic motors have several advantages over electric submersibles.

Competitive Advantages

- Heat treated cast pump housing for long life
- Lighter than other submersible pumps
- Aluminum or stainless steel frame available
- Cost effective compared to other pumps
- Simple design allows for easy servicing
- Field service in under an hour
- Pumps 100 barrels of 15lbs (6k) drill mud in 9 min
- Easily field repairable by any mechanic
- Minimizes costly pump repairs
- Anti-clog double suction technology
- Pumps heavy oilfield drill mud & solids

Fast Facts

Weight:	131lb (59kg)
Max Water Flow:	1000GPM (227m ³ /h)
Max Vertical Head:	195 Feet (59m)
Operating PSI:	2000-3000 PSI (138-206 Bar)
Hydraulic Flow:	4 to 30 GPM (15-113lpm)
Power Source:	Hydraulic Driven
Material:	Ductile Iron
Discharge:	4" Male Cam Lock
Dimensions:	22"x17"x15"(55cm x 43cm x 38cm)
Hydraulic Oil:	AW-32 or AW-46
Frame:	316 L, 1/4" Plates
